

## WITHDRAWING FUNDS

### How do I withdraw money? ▲

Your withdrawal method will depend on the deposit method.

If you make a deposit from a card, you will be able to withdraw your initial deposit amount back to the card, because it is processed as a refund. To be precise, you will be able to withdraw the total amount of your deposits over the last 90 days to your card. Everything that exceeds this amount (your profit) may be withdrawn to an e-wallet (Skrill, Neteller, WebMoney).

If you use an e-wallet to deposit, you will only be able to withdraw to the same e-wallet account. In order to withdraw funds, make a withdrawal request on the [withdrawal page](#). Withdrawal requests are processed by IQ Option within 3 business days. If you withdraw to a bank card, it will take another 1-9 business days for the bank to process this transaction.
